

I'm writting to ask you to reject the NAB's petition 04-160. I am a truck driver by profession and depend on the weather and traffic infomation I get on my XM Radio. Not only is it important for my safety to be able to access this information without having to search local radio channels in areas where I'm not familiar, it's also important for the safety of those who are on the road with me. Thank you for your time and consideration in this matter.

Sincerely
Newell Clark
